UNOFFICIAL

b. This system is equipped with an alarm which indicates when the pressure differential across the vent cartridges is out of range. Record incidents when the pressure differential alarm is triggered and the corrective actions taken;
c. Quarterly inspections of the vent cartridges; inspections, replacements, and repairs logged.

Items a, b, and c shall be logged. The log shall be maintained current, on-site for a minimum of 5 years and provided to District personnel on request.

5. The dust collector shall discharge no more than 0.01 grains/dscf at the operating conditions given in the above description (BACT). This equipment does not require a regularly scheduled emission compliance test. However, emission compliance testing may be required at the discretion of the District.

6. The dust collector shall have no visible emissions.
