Air Pollution Control Officer

2. A log shall be maintained weekly, which contains the following:

- a. Daily production of all pump-outs;
- b. All additions to the tank; and
- c. Amount of metal removed.

This log shall be maintained current, on-site for a minimum of 5 years and provided to District personnel on request.

3. This process shall be limited to use on steel products, parts, and/or materials.

4. The Operating Procedure, which has been established, shall be provided to District personnel on request.

5. A non-reactive gas shall be used to agitate the contents of the process tank.

6. Emissions from this facility shall be less than the following limits:

- a. 15 tons of PM10 calculated on a 12 month rolling sum
- b. 25 tons of NOx calculated on a 12 month rolling sum
- c. 25 tons of VOC calculated on a 12 month rolling sum

Compliance with this limit shall be verified with monthly facility emission summaries and an annual emissions inventory. Monthly emissions summaries shall be calculated using a District-approved method, with at least the last two years of monthly emissions summaries maintained and available to be provided to District, State or Federal personnel upon request. 12 month rolling sum summary shall be submitted to the District and to USEPA postmarked no later than July 30 of each year. The 12 month rolling sum summary will consist of twelve monthly (July 1 to June 30) sum values.

[District Rule 1303]

7. The facility must submit accurate emissions inventory data to the District, in a format approved by the District, on a yearly basis, which is to be received by the District no later than April 30 of each year.
