

MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT

14306 Park Avenue Victorville, CA 92392-2310
760.245.1661 -- 800.635.4617 -- FAX 760.245.2022

AUTHORITY TO CONSTRUCT

A013966

If construction is not completed by the expiration date of this permit, it may be renewed for one additional year upon payment of applicable fees. Any additional extension will require the written approval of the Air Pollution Control Officer. This Authority to Construct may serve as a temporary Permit to Operate provided the APCO is given prior notice of intent to operate and the Permit to Operate is not specifically denied.

EXPIRES LAST DAY OF: AUGUST 2025

OWNER OF OPERATOR (Co. #1762)

Description:

ABRASIVE BLASTING UNIT, PORTABLE consisting of: Blastrac, Model No. 1-10D, 50 pound capacity, 1-5- W. x 3'-4- L. x 3'-4- H., Serial No. 140368 with one nozzle, maximum inside diameter of 1/2", powered by a 10 hp motor. See: <https://ww2.arb.ca.gov/our-work/programs/abrasive-blasting-program/abrasive-blasting-certification-executive-orders> <https://ww2.arb.ca.gov/our-work/programs/abrasive-blasting-program-certified-abrasives>

CONDITIONS:

1. This equipment shall be installed, operated and maintained in strict accordance with those recommendations of the manufacturer/supplier and/or sound engineering principles which produce the minimum emissions of contaminants. Unless otherwise noted, this equipment shall also be operated in accordance with all data and specifications submitted with the application for this permit. [District Rule 1302(C)(2)(a)]

2. After each abatement use, this equipment must be emptied and cleaned within a negative air enclosure, and filters and waste collected with this equipment must be disposed as friable asbestos waste. [District Rule 1320; 40 CFR 61, Subpart M]

3. During full containment projects, view ports shall be provided for inspection purposes. The view port dimensions shall be at least 18 inches square and the bottom of said port no less than 3 to 4 feet from the floor level. [District Rule 204]

Fee Schedule: 7 (e)

Rating: 1 device

SIC: 1795

SCC: 50200901

Location/UTM(Km): 473E/3956N

This permit does not authorize the emission of air contaminants in excess of those allowed by law, including Division 26 of the Health and Safety Code of the State of California and the Rules and Regulations of the District. This permit cannot be construed as permission to violate existing laws, ordinances, statutes or regulations of this or other governmental agencies. This permit must be renewed by the expiration date above. If billing for renewal fee required by Rule 301(c) is not received by expiration date above, please contact the District.

Cerritos, CA 90703

By: **COPY**
Brad Poiriez
Air Pollution Control Officer

4.Viewing ports shall be sufficient in number to allow observation of all stripping and removal operations.
[District Rule 204]

5.A mechanical gauge shall be installed so as to indicate, in inches of water column, the pressure differential between the containment and the outside. The mechanical gauge shall be located in a manner that will allow an observer to easily monitor the differential pressure from outside the containment.
[District Rule 204; OSHA 29 CFR 1926.1101]

6.Owner/operator shall maintain negative pressure of 0.02 inches of water gauge minimum in the work area to prevent contaminants from escaping the containment barriers and to ensure that the negative air machine airflow is adequate.
[OSHA 29 CFR 1926.1101]

7.The hours of operation of this device shall not exceed 1000 hours per year when operated at any single demolition or renovation site (site). The combined operating hours of all co-located negative air machines shall not exceed 1000 hours per year at any single site.
[District Rule 1520]

8.This unit may, at the discretion of the owner/operator, be used on any commercial asbestos abatement project for a demolition or renovation pursuant to 40 CFR 61, Subpart M - National Emission Standard for Asbestos if the project is properly notified to the District. Proper notification must be consistent with 40 CFR 61, Subpart M, a minimum of ten (10) working days prior to commencement and sent to asbestos@mdaqmd.ca.gov.
[40 CFR 61, Subpart M]

9.Any project containing Regulated Asbestos Containing Material (RACM) shall have onsite at least one trained operator as specified in 40 CFR 61.145(c)(8) during the removal of RACM. Evidence of training shall be presented to District personnel upon request.
[40 CFR 61, Subpart M]

10.This equipment and all operations pertaining to the use of this equipment are subject to the requirements of the National Emission Standard for Hazardous Air Pollutants, Subpart M - NESHAP for Asbestos (40 CFR 61, Subpart M).

11.This unit shall not operate within 1000 feet of the outer boundary of any K-12 school. Proposed operations inside this boundary may require Public Noticing and or additional equipment restrictions. Therefore, any project proposed inside this boundary will require the submittal of a new application to revise this permit to operate. This is required to ensure compliance with the applicable requirements of the California Health and Safety Code Section 42301.6.
[District Rule 1302 and H&S Code 42301.6]

12.All abrasive blasting operations conducted at this facility shall comply with Title 17 California Code of Regulations sections 92000-92530.
[District Rule 1302]

13.The owner/operator shall maintain a log which contains at a minimum the following information. The log shall be maintained current, on-site for a minimum of two years and provided to District, State or Federal personnel on request.

- a. type of abrasive blast material used;
- b. substrate of item to be blasted;
- c. blast nozzle diameter;
- d. operating pressure in psi;
- e. date and duration (in hours) of use (summarized annually) or monthly total of blast media consumed (summarized annually);
- f. percent of total operating time wet blasting is conducted;
- g. location of blasting operations;

And as required by Condition 15 below:

- h. Date of decontaminated;
- i. Name and signature of person conducting decontamination, and
- J. Name Signature of the person certifying that decontamination has occurred and that the equipment no longer contains any visible asbestos containing residue.

[District Rule 1302; 17 CCR 92000]

14. Emissions from abrasive blasting operations shall not exceed the following visible emission limits for a period or periods aggregating more than three minutes in any one hour:

a. Fully enclosed blasting- 20 percent opacity (Ringleman 1).

[District Rule 401 and 17 CCR 92200]

Note: Visible emission observations shall be conducted in accordance with the requirements set forth in Title 17 CCR 92000-92530.

15. Prior to removal from the containment area, this equipment shall be thoroughly decontaminated using wet decontamination (or 'wet wiping'). This procedure involves using disposable rags to wipe contaminated surfaces and objects. If a bucket of water is being used, rags must not be re-wetted in the bucket as this would contaminate the water making it asbestos waste. All rags must then be disposed of as asbestos-contaminated waste. A record shall be made that this decontamination procedure was followed and include the following:

1) Date of decontamination;

2) Name and signature of person conducting decontamination;

3) Name and Signature of the person certifying that decontamination has occurred and that the equipment no longer contains any visible asbestos containing residue.

[District Rule 1302(C)(2)(a)]

16. This device shall be used in conjunction with a Blastrac Model BDC-654 control device operating with valid District Permit C013990.

[District Rule 1302(C)(2)(a)]

17. A facility wide Comprehensive Emission Inventory (CEI) for all emitted criteria and toxic air pollutants must be submitted to the District, in a format approved by the District, upon District request.

[District Rule 107(b), H&S Code 39607 & 44341-44342, and 40 CFR 51, Subpart A]
