**Brad Poiriez**  
Air Pollution Control Officer

3.The maximum ore processed by this equipment shall not exceed 2400 ton/day and 100 ton/hour.

4.A production log shall be maintained, which includes as a minimum, the weight of mix produced on an hourly and daily basis (midnight to midnight), the total hours operated, breakdowns, maintenance and repairs performed and all visible emissions reports. The log shall be maintained current, on-site for a minimum of 2 years and provided to District personnel on request.

5.At least once per calendar quarter, the owner/operator, o/o, shall have a Certified Visible Emissions Reader conduct an opacity check of all transfer points as well as other emissions points pursuant to USEPA method 9. These emissions results shall be logged, as mentioned above.

6.This equipment shall be operated and maintained in strict accord with the recommendations of the manufacturer and/or sound engineering principles.
