Description:

SOIL REMEDIATION consisting of: Equipment which includes a water pump for extraction of water from below ground, a tank to hold this water which is contaminated with chlorinated organics. Inside the tank is an air sparger for aeration of the water pumped therein. A blower for the tank/sparger is also provided as are the necessary instrumentation, valving, piping, electrical and other necessary equipment.

CONDITIONS:

1. Operation of this equipment shall be in strict compliance with all information submitted with the application for this permit, unless specifically exempted hereunder.
2. During these operations, determinations for VOCs shall be made using an electron capture detector (ECD), or another method which this District finds equivalent.
3. Emissions determinations shall be made during the first two days of initial start-up. Subsequent to the initial readings, the monitoring may be reduced to monthly bag samples with analyses according to EPA Methods, until completion of the project.
4. Emissions samplings shall be measured at the exhaust of the sparge tank.
5. On-site measurement methods shall be considered invalid unless calibrations are performed with a known concentration of a chlorinated VOC which is present in the emissions.
