 Brad Poiriez  
 Executive Director

## **CONDITIONS:**

1. Operation of the equipment described above shall be conducted as described in the data and specifications submitted with the application under which this permit is issued unless specifically exempted hereunder.
  
2. This concrete batch plant shall not be operated unless the Weigh Hopper discharge, and Truck Loadout shroud are vented to a properly functioning air pollution control device under valid District permit C008539. Additionally, the Cement and flyash silo's must have properly operating and maintained vent filters.
  
3. This concrete batch plant shall only be operated/maintained in strict accord with manufacturer's supplier's recommendations and/or sound engineering principles.
  
4. Roadways, work areas, stock piles, and materials being processed shall be kept wetted to control fugitive dust. Equipment to properly wet the material being processed shall be maintained in operable condition on-site and used as necessary to assure compliance.
  
5. Water sprays shall be used at conveyor points of charge and discharge to control fugitive emissions.
  
6. Daily production logs shall be maintained at either the facility or corporate office for at two (2) years and available to District, State, or Federal personnel upon request. This log shall contain, as a minimum, the cubic yard of concrete mix produced per day and the total number of hours operated.
  
7. The owner/operator shall comply with all applicable Rules and Regulations of the District. Applicable rules include, but are not necessarily limited to Rules 401, 402, 403, 404, 405, and 430.
  
8. This facility shall emit less than the following limits:
  - a. 8 tons per year of any single HAP or 20 tons per year of any combination of HAPs
  - b. 12 tons of PM10
  - c. 20 tons of NOx on a rolling twelve month summary basis

Compliance with this limit shall be verified with monthly facility emission summaries and an annual emissions inventory. Monthly emissions summaries shall be calculated using a District-approved method, with at least the last two years of monthly emissions summaries maintained for a minimum of two years and provided to District, State or Federal personnel upon request. A facility wide Comprehensive Emission Inventory (CEI) for all emitted criteria and toxic air pollutants must be submitted to the District, in a format approved by the District, upon District request.

[District Rule 107(b); H&S Code 39607 & 44341-44342; and 40 CFR 51, Subpart A]
