CONDITIONS:

1. This facility is limited to processing no more than 100,000 tons of recycled crumb rubber material in any consecutive 12 calendar month period.

2. The owner/operator, o/o, shall operate all the equipment delineated above in strict accord with the recommendations of the manufacturer/supplier and/or sound engineering principles, which produce the minimum of emissions.

3. The o/o shall maintain a log of the hours of operation and total tons of Crumb Rubber processed on a daily basis. This log may be derived from records required by the responsible agency administering the oversight of the construction. This log shall be maintained current, on-site for a minimum of 2 years while in operation (or at the principal place of business when on-site operations are discontinued), and shall be provided to District personnel on request.

4. Materials processed by equipment delineated above shall contain sufficient natural and/or added moisture to ensure compliance with District rules 401, 402 and 403. Sufficient water and equipment in operable condition shall be maintained on-site and used as necessary to ensure compliance with these rules. This condition also applies to all haul roads and paved roads in and throughout the facility.

5. This equipment shall not be operated unless Asphalt Oil Truck Unloading operations and process heater are vented through a properly operating integral Blue Smoke Condenser.

6. The owner/operator shall notify the District at least ten (10) days prior to operation of this equipment. Notification must be sent electronically to engineering@mdaqmd.ca.gov. The notification must include:
 - a. The permit number.
 - b. The location/address where the equipment will be operated.
 - c. The estimated duration of the operation (including start up and stop dates).
 - d. The contact information of the owner/operator of the equipment.[District Rule 204]

7. The emissions estimates and manner of operation described in the submittal with the application under which this permit is issued are incorporated into this permit in their entirety and act as specific limitations on the equipment described herein.

8. This equipment and associated operations shall not discharge an exhaust stream that exhibits opacity greater than twenty percent (Ringlemann 1).

9. This equipment shall not operate concurrent with the asphalt and crumb rubber blending system under valid District permit B013872. [District Rule 1303]

10. A facility wide Comprehensive Emission Inventory (CEI) for all emitted criteria and toxic air pollutants must be submitted to the District, in a format approved by the District, upon District request. [District Rule 107(b); H&S Code 39607 & 44341-44342; and 40 CFR 51, Subpart A]
