Description:

ABRASIVE BLAST UNIT consisting of: Container Room, 20' l x 8' w x 10' h, modified by supplier, Kelco; and using existing K124 blast pot, a Model DFO 3-18 dust collector with Torit blower and 30 hp motor, a recovery system which includes a vortex separator and 600 lb abrasive supply hopper, and carbon monoxide monitor and calibration kit.

CONDITIONS:

1. The owner/operator shall maintain an operations log for this system. This log shall be maintained current, on-site for a minimum of five (5) years and provided to District, state or federal personnel on request, and include at least the following information:
 - a. Dates and results of periodic emission point observations.
 - b. Daily amount and type of abrasive consumed.
 - c. Amount of operation each day (in hours).

2. This system shall not discharge into the atmosphere emissions which have an opacity greater than 10%. Compliance with this condition shall be determined through periodic (at least once per month) visual observations of the dust collector exhaust point during abrasive blasting operations.

3. Abrasive blasting shall not occur within this unit unless it is actively exhausting through the filtering unit with valid District Permit C008833.

4. This abrasive blast system shall only be operated/maintained in strict accord with manufacturer's/supplier's recommendations and/or sound engineering principles.
