2. Materials processed under this permit shall contain sufficient natural and/or added moisture to ensure compliance with District rules 401 and 403. Sufficient water and equipment in operable condition shall be maintained on-site and used as necessary to ensure compliance with the above mentioned rules.

3. This facility shall emit less than the following limits:

- a. 10 tons per year of any single HAP or 25 tons per year of any combination of HAPs
- b. 15 tons of PM10 on a rolling twelve month summary basis.
- c. 20 tons of NOx on a rolling twelve month summary basis.
- d. 20 tons of VOC on a rolling twelve month summary basis

Compliance with this limit shall be verified with monthly facility emission summaries and an annual emissions inventory. Monthly emissions summaries shall be calculated using a District-approved method, with at least the last two years of monthly emissions summaries maintained for a minimum of two years and provided to District, State or Federal personnel upon request. The facility must also submit an accurate emissions inventory data to the District, in a format approved by the District, on a yearly basis, which is to be received by the District no later than April 30 of each year.
