Adelanto, CA 92301

Description:

MIXING BLENDED AND STORAGE consisting of: MIXING, BLENDED AND STORING of adhesives and/or clay slurry products. This equipment consists of tanks, mixers, storage tanks for both solids and liquids. Generally there are two separate lines doing the same types of operations. Each line has its own control (baghouse) for particulate. The resin cut line consists of adding flakes of resin to oil in a tank, mixing and storing prior to use. Use of this mixture consists of adding latex emulsion to it and adding clay slurry together with the mixture to make a mastic for carpet. The slurry is made by adding solid clay to water, mixing and storing for later use. Both the clay slurry mixing tank (wherein the solid is added to water) and the resin cut blender (wherein the resin is added to the mineral oil) are served by controls. Packing includes aqueous materials being added to quart, gallon, 3.5 gallon and 5 gallon containers.

CONDITIONS:

1. When solid materials are being added to the mineral oil containing tank, the baghouse, properly functioning under valid District permit C007982 shall be operating concurrently.
2. When solid materials are being added to the slurry blending tank, the baghouse, properly functioning under valid District permit C007982 shall be operating concurrently.

Fee Schedule: 5 (b)

Rating: 33500 gallons

SIC: 2891

SCC: 99999999

Location/UTM(Km):
460E/3822N

This permit does not authorize the emission of air contaminants in excess of those allowed by law, including Division 26 of the Health and Safety Code of the State of California and the Rules and Regulations of the District. This permit cannot be construed as permission to violate existing laws, ordinances, statutes or regulations of this or other governmental agencies. This permit must be renewed by the expiration date above. If billing for renewal fee required by Rule 301(c) is not received by expiration date above, please contact the District.
