Capacity	Equipment Description
1.5	Oil Tank Heater
0	Condenser
0	Filter Canister
0	The above hp have been converted to Btu/h equivalent for fee rating purposes

CONDITIONS:

1. This facility is limited to processing no more than 1.1 millions tons of Asphalt in any consecutive 12 calendar month period.
2. The owner/operator, o/o, shall operate all the equipment delineated above in strict accord with the recommendations of the manufacturer/supplier and/or sound engineering principles, which produce the minimum of emissions.
3. The o/o shall maintain a log of the hours of operation and total tons of Asphalt produced on a daily basis. This log may be derived from records required by the responsible agency administering the oversight of the construction. This log shall be maintained current, on-site for a minimum of 2 years and provided to District personnel on request.
4. Materials processed by equipment delineated above shall contain sufficient natural and/or added moisture to ensure compliance with District rules 401, 402 and 403. Sufficient water and equipment in operable condition shall be maintained on-site and used as necessary to ensure compliance with these rules. This condition also applies to all haul roads and paved roads in and throughout the facility.
5. All conveyor belt transfer points shall be equipped with spray bars and shall be fully operational before any throughput of materials has commenced during any days operation. Spray bars shall only be shut off when that portion of the operation has ceased for the day.
6. This facility shall not be operated unless vented to the baghouse described in District permit C008381.
7. The owner/operator shall notify the District Stationary Sources Section 10 days prior to operation of this facility.
8. The emissions estimates and manner of operation described in the submittal with the application under which this permit is issued are incorporated into this permit in their entirety and act as specific limitations on the equipment described herein.
9. This facility shall emit less than 15 tons of PM10 and 25 tons of NOx on a rolling twelve month summary basis. Compliance with this limit shall be verified with monthly facility emission summaries calculated using a District-approved method, with at least the last two years of monthly emissions summaries maintained for a minimum of two years and provided to District, State or Federal personnel upon request.
