contaminants.

3. This equipment and associated operations shall not discharge an exhaust stream that exhibits opacity greater than twenty percent (Ringlemann 1).

4. The o/o shall ensure that the materials used in the equipment contain sufficient natural and/or added moisture to preclude violations of District rules 401, 402, 403 and Regulation XIII. These rules pertain to opacity, dust blowing off of the property, nuisance and new source review. The o/o shall maintain sufficient water and equipment for its application in operable condition and on-site, and use it as necessary on material piles, haul roads, and in the plant to prevent violations of the above rules.

5. A daily production and operations log shall be maintained current and on-site for two (2) years, and shall be provided to District personnel upon request. This log shall contain, at a minimum:

- a. Daily and annual tonnage of finished product;
- b. Weekly visible emissions determinations (using USEPA Method 22, and USEPA Method 9 if necessary);
- c. Maintenance and repairs on plant and supporting equipment.
