0	Vane Feeder w/hydraulic drive
0	Vane Feeder w/hydraulic drive (Pug mill discharge)
0	H-1 Storage hopper (45 cu yd)
25	C-16 Storage Hopper unloading belt

CONDITIONS:

1. This facility shall not process more than 350 tons of Asphalt per hour.

2. The owner/operator, o/o, shall operate all the equipment delineated above in strict accord with the recommendations of the manufacturer/supplier and/or sound engineering principles, which produce the minimum of emissions.

3. The o/o shall maintain a log of the hours of operation and total tons of Asphalt produced on a daily basis. This log shall be maintained current, on-site for a minimum of 2 years and provided to District personnel on request.

4. Materials processed by equipment shall contain sufficient natural and/or added moisture to ensure compliance with District rules 401, 402 and 403. Sufficient water and equipment in operable condition shall be maintained on-site and used as necessary to ensure compliance with these rules. This condition also applies to all haul roads and paved roads in and throughout the facility.

5. All conveyor belt transfer points shall be equipped with spray bars and shall be fully operational before any throughput of materials has commenced during any days operation. Spray bars shall only be shut off when that portion of the operation has ceased for the day.

6. The owner/operator shall notify the District Stationary Sources Section 10 days prior to operation of this facility.

7. The emissions estimates and manner of operation described in the submittal with the application under which this permit is issued are incorporated into this permit in their entirety and act as specific limitations on the equipment described herein.

8. Electrical power for this facility shall only be provided by grid power or by an engine (or engines) with a valid District permit or CARB registration.
