Capacity	Equipment Description
0.31	Mixing Drum, w/infrared mix temperature sensor, 125 hp
0	ASPHALT CEMENT STORAGE
0	Storage Tanks (2), 30,000 gal each
0.03	Pumps (2), Positive Displacement, 7.5 hp each
0	HOT-MIX ASPHALT STORAGE
0	Storage Silo, 150 ton
0.07	Conveyor, Drag Slat, 30 hp

CONDITIONS:

1. This facility is limited to processing no more than 1,000,000 tons of Asphalt in any consecutive 12 calendar month period.
2. The owner/operator, o/o, shall operate all the equipment delineated above in strict accord with the recommendations of the manufacturer/supplier and/or sound engineering principles, which produce the minimum of emissions.
3. The o/o shall maintain a log of the hours of operation and total tons of Asphalt produced on a daily basis. This log may be derived from records required by the responsible agency administering the oversight of the construction. This log shall be maintained current, on-site for a minimum of 2 years while in operation (or at the principal place of business when on-site operations are discontinued), and shall be provided to District personnel on request.
4. Materials processed by equipment delineated above shall contain sufficient natural and/or added moisture to ensure compliance with District rules 401, 402 and 403. Sufficient water and equipment in operable condition shall be maintained on-site and used as necessary to ensure compliance with these rules. This condition also applies to all haul roads and paved roads in and throughout the facility.
5. This equipment shall not be operated unless vented to the baghouse described in District permit C008946.
6. The owner/operator shall notify the District Stationary Sources Section 10 days prior to operation of this facility.
7. The emissions estimates and manner of operation described in the submittal with the application under which this permit is issued are incorporated into this permit in their entirety and act as specific limitations on the equipment described herein.
