Air Pollution Control Officer

1. This equipment and associated operations shall not discharge an exhaust stream that exhibits opacity greater than twenty percent (Ringelmann 1).
2. The owner/operator (o/o) shall maintain a log of all material throughput amounts so as to verify the above condition. Additionally, a log shall be kept of all inspections, repairs, and maintenance on equipment. Such logs or records shall be maintained at either the facility or corporate office for at two (2) years and available to District, State, or Federal personnel upon request.
3. This equipment shall not be operated unless the associated cement/flyash weigh hopper and up/down hopper emissions are vented through a properly operating baghouse with a valid District permit C009671.
4. Maximum plant concrete throughput shall not exceed 1.872 MMTPY. Maximum plant PM-10 emissions shall not exceed 3.04 tons per year.
5. The owner/operator (o/o) shall maintain this equipment in strict accord with those recommendations of the manufacturer/supplier and/or sound engineering principles which produce the minimum emissions of air contaminants.
6. Cement and Fly Ash Truck unloading shall only occur through a properly operating pneumatic truck unloading system, and only into designated storage silos, venting to properly operated and maintained Filter Vents.
7. All open material transfer points, such as conveyor drops, hopper and bin loading, shall be equipped with water sprays to minimize emissions of particulate matter.
8. The o/o shall ensure that the materials used in the equipment contain sufficient natural and/or added moisture to preclude violations of District rules 401, 402 and 403. These rules pertain to opacity, dust blowing off of the property and nuisance. The o/o shall maintain sufficient water and equipment for its application in operable condition and on-site, and use it as necessary on material piles, haul roads, and in the plant to prevent violations of the above rules.
