

MOJAVE DESERT AIR QUALITY MANAGEMENT DISTRICT

14306 Park Avenue Victorville, CA92392-2310
760.245.1661 -- 800.635.4617 -- FAX760.245.2022

INACTIVE

B013116

Inactive type Permit has no description information.

EXPIRES LAST DAY OF: JUNE 2024

OWNER OF OPERATOR (Co.#503)

Robertson's Ready Mix
P.O.Box 3600
Corona, CA92878

EQUIPMENT LOCATION (Fac.#3793)

Robertson's Ready Mix - Various Locations
District Wide
MDAQMD, CA92392

Description:

PORTABLE SCREENING PLANT consisting of: Manufactured by Sandvik, Model QA-451, Serial No: TBD, rated at 500 tph. Powered by a DICE registered in the DOORS program, EIN TBD, 100 HP.

EQUIPMENT

Capacity	Equipment Description
0	grizzly, static
0	screen
0	conveyor
0	conveyor
0	conveyor
0	conveyor
0	conveyor - portable, powered by EIN BX7N55

CONDITIONS:

1. This equipment shall be installed, operated and maintained in strict accordance with those recommendations of the manufacturer/supplier and/or sound engineering principles which produce the minimum emissions of contaminants. Unless otherwise noted, this equipment shall also be operated in accordance with all data and specifications submitted with the application for this permit. [District Rules 204 and 1302]

2. If line power is not available, power for this equipment shall only be provided by an engine with a valid District permit.

Fee Schedule: 1 (b) Rating: 166bhp SIC: 3273 SCC: 30502006 Location/UTM(Km): 474E/3824N

This permit does not authorize the emission of air contaminants in excess of those allowed by law, including Division 26 of the Health and Safety Code of the State of California and the Rules and Regulations of the District. This permit cannot be construed as permission to violate existing laws, ordinances, statutes or regulations of this or other governmental agencies. This permit must be renewed by the expiration date above. If billing for renewal fee required by Rule 301(c) is not received by expiration date above, please contact the District.

Brad Poiriez
Air Pollution Control Officer

[District Rules 1302 and 1320]

3.This equipment must be equipped with a water spray system with nozzles sufficient to observe the opacity limits specified in this permit. The equipment shall not be operated unless this water spray system is operating properly.

[District Rules 1302 and 1303]

4.The owner or operator must perform weekly inspections to verify that water is properly flowing through all discharge spray nozzles in the wet suppression system. The owner/operator must initiate corrective action within 24 hours and complete corrective action as expediently as practical if they find that water is not flowing properly during such inspections. The owner/operator must record each inspection of the water spray nozzles, including the date of each inspection and any corrective actions taken, in the logbook.

[40 CFR 60.674 (b)]

5.The owner/operator will periodically monitor opacity from fugitive emission points according to the following methodology:

(a) Conduct quarterly 30-minute visible emissions inspections using EPA Method 22 (40 CFR part 60, appendix A-7). The Method 22 (40 CFR part 60, appendix A-7) test shall be conducted while the baghouse is operating. The test is successful if no visible emissions are observed.

(b) If any visible emissions are observed, the owner or operator of the affected facility must initiate corrective action within 24 hours to return the baghouse to normal operation.

[District Rules 1302 and 1303]

6.Roadways, work areas and stockpiles shall be kept wetted to control fugitive dust. Equipment to properly wet the material being processed shall be maintained in operable condition on-site and used as necessary to assure compliance. This does not include the haul roads outside of the fenced facility.

[District Regulation IV]

7.This equipment shall not discharge into the atmosphere an exhaust stream that exhibits an opacity during any one hour (ten 6-minute averages) greater than seven (7) percent opacity from all transfer points and fugitive emission points.

[40 CFR 60.672]

8.A facility log shall be maintained on-site and made available to District personnel upon request. This log shall contain, at a minimum:

(a) Dates this equipment is moved from one location to another, and permit unit associated with or location of use if used independently, applies to radial stackers only,

(b) Each Method 22 (40 CFR part 60, appendix A-7) test required by condition 5, including the date, opacity reading results from fugitive emission points and any corrective actions taken,

(c) Water spray system inspection records required by Condition 4, and

(d) Records of 40 CFR 60, Subpart OOO initial compliance testing required by condition 10.

[District Rules 204 and 1302]

9.The owner/operator shall conduct an initial compliance test per 40 CFR 60 Subpart OOO requirements, including opacity (USEPA Method 9 or equivalent) testing as applicable for each fugitive emission point (transfer point or other) associated with this equipment. The initial compliance test must be conducted no later than September 10, 2018. Compliance test shall be carried out in accordance with the test methods defined in 40 CFR 60, Subpart OOO Section 60.675 and the District Compliance Test Procedural Manual. The test results shall be submitted to the District not later than 45 days after completion of the test. The owner/operator shall notify the District in writing 10 days prior to testing so that a District observer may be present during test.

[40 CFR 60.672]

10.The owner or operator shall submit written reports to the District of the results of all performance tests conducted to demonstrate compliance with the standards set forth in 40 CFR 60.672, including reports of opacity observations. Reports shall be submitted electronically to reporting@mdaqmd.ca.gov

11.Because this equipment operates in conjunction with portable crushing equipment which is subject to 40 CFR 60 Subpart OOO - Standards of Performance for Nonmetallic Mineral Processing Plants, this equipment shall be operated in compliance with all applicable requirements of that regulation. In the event of conflict between Permit conditions and the requirements of 40 CFR 60, Subpart OOO, the more stringent requirements shall govern.

[District Rule 204]

12. In the event of any equipment malfunction or breakdown as defined in District Rule 430, the event must be reported to the District within one hour.

[District Rule 430]

13. This equipment shall not operate at any one location for more than 365 days.

[District Rule 1320]

14. The facility shall not emit more than 14.9 tons/year of PM10.

[District Rule 1303 (A) BACT, (B) Offsets]

15. A facility wide Comprehensive Emission Inventory (CEI) for all emitted criteria and toxic air pollutants must be submitted to the District, in a format approved by the District, upon District request.

[District Rule 107(b); H&S Code 39607 & 44341-44342; and 40 CFR 51, Subpart A]
