CONDITIONS:

1.This equipment shall be installed, operated and maintained in strict accordance with those recommendations of the manufacturer/supplier and/or sound engineering principles which produce the minimum emissions of contaminants. Unless otherwise noted, this equipment shall also be operated in accordance with all data and specifications submitted with the application for this permit.
[District Rule 1302]

2.The bulk bag packager must be vented to the packager dust collector under C014392 when in operation. All other material handling points except for transfer points are to be fully enclosed, controlled via dust collectors/bin vents and/or maintained at a sufficient moisture content such that there are no visible emissions. The passive dust collectors/bin vents shall be equipped with filters which meet 99.9% control efficiency of particulates at the operating conditions specified in the equipment description. To demonstrate compliance with this opacity limitation the owner/operator shall conduct a monthly 6-minute visible emissions evaluation on each emission point and fugitive emission point associated with this equipment in accordance with USEPA Method 22. The evaluation must be conducted while the affected source is in operation.
[District Rule 1303 - BACT]

3.Annual throughput shall not exceed 35,419 tons/year.
[District Rules 1302 and 1320]

4.The owner/operator, o/o, shall maintain the following records at a minimum:
a. Monthly visible emissions determinations as required by condition 2; results logged;
b. Throughput processed lb/year.
Items a and b shall be logged at least monthly. Records shall be maintained current, on-site for a minimum of 5 years and provided to District personnel on request.
[District Rules 401 and 1303 - BACT]

5.Actual emissions from this facility shall be less than the following:
a. 42 tons per year of NOx [Rule 1303(B)]
b. 46 tons per year of PM10 [Rule 1303(B)]
c. 25 tons per year of VOC
d. 25 tons per year of SOx
e. 100 tons per year of CO, calculated on a rolling twelve-month basis
f. 10 tons per year for any single HAP and 25 tons per year for any combination of HAPs calculated on a rolling twelve-month basis.
HAPs are defined in 40 CFR 61.01 and are the chemical compounds listed in section 112(b) of the Clean Air Act (Act). Compliance with the annual emission limits shall be demonstrated via 12 month rolling sum for CO and HAP via annual emission inventory reports for all criteria pollutants and HAP.
[District Rule 1303 - Offsets]

6.A facility wide Comprehensive Emission Inventory (CEI) for all emitted criteria and toxic air pollutants must be submitted to the District, in a format approved by the District, upon District request.
[District Rule 107(b); H&S Code 39607 & 44341-44342; and 40 CFR 51, Subpart A]
