760.245.1661 -- 800.635.4617 -- FAX 760.245.2022

INACTIVE

C001797

Inactive type Permit has no description information.

EXPIRES LAST DAY OF: JANUARY 2002

OWNER OF OPERATOR (Co.#270)

AGC Flat Glass North America, Inc. (AGC)
11175 Cicero Dr, Ste 400
Alpharetta, GA 30022

EQUIPMENT LOCATION (Fac.#935)

AGC Flat Glass North America, Inc. (AGC)
17300 Silica Dr
Victorville, CA 92395

Description:

THERMAL DENOX SYSTEM consisting of: Ammonia Injection Nozzles, 228 in each of two regenerative units. There are 38 nozzles on both the inside and outside at 3 levels. The flow rate of the ammonia is 600-800 cu ft per hour; the heater for the ammonia supply is 30 kW and the air compressor is rated at 140 hp.

CONDITIONS:

1. Routine and/or preventative maintenance, which requires this unit to be off line shall be done in accord with Condition no. 6 of District permit B001726. This condition is repeated here as follows:

During routine or preventative maintenance of the three add-on pollution controls and during periods of regenerator clean-out, the owner/operator shall be exempt from the emissions limits specified in condition 7 (of District permit B001796) provided the following are complied with:

- A. Maintenance in any twelve month period does not exceed six days (144 hours);
- B. Maintenance shall be performed twice in any twelve month period for not more than 72 hours for each maintenance activity, unless prior written approval from the APCO has been obtained;
- C. Maintenance shall be conducted in a manner consistent with good air pollution practices for minimizing emissions to the atmosphere;
- D. Procedures for each maintenance shutdown shall be submitted to the District for approval at least 10 days prior to a shutdown. If 10 days is impractical, e.g., in the case of an emergency, the o/o shall notify the District by telephone and submit the planned procedures for the maintenance as soon as practicable; and
- E. A summary report of all findings and repairs/modifications which were made during the shutdown shall be submitted to the District within 15 days of completion of the maintenance shutdown.

Fee Schedule: 7 (h)

Rating: 1 device

SIC: 3211

SCC: 99999999

Location/UTM(Km):
474E/3815N

This permit does not authorize the emission of air contaminants in excess of those allowed by law, including Division 26 of the Health and Safety Code of the State of California and the Rules and Regulations of the District. This permit cannot be construed as permission to violate existing laws, ordinances, statutes or regulations of this or other governmental agencies. This permit must be renewed by the expiration date above. If billing for renewal fee required by Rule 301(c) is not received by expiration date above, please contact the District.

Air Pollution Control Officer

2. This unit shall be operated and maintained in strict accord with the recommendations of the manufacturer/supplier and/or sound engineering principles consistent with the minimum emissions of contaminants.

3. Oxides of nitrogen emissions to the atmosphere shall be monitored by a Continuous Emissions Monitoring System (CEMS) operated and maintained with the District and USEPA Rules and Specifications.

4. Oxides of nitrogen emissions to the atmosphere shall not exceed 220 lb/h based on a three hour rolling average and/or 200 lb/h based on a 24 hour rolling average.
