Description:

SILO - STORAGE consisting of: Portable, Bel Grade whose capacity is 300 barrels of dry cement. This silo is equipped with a positive drive feed system including a 10 hp, 3-phase motor, and a 225 square foot integral baghouse, whose efficiency is 99.9% for all particles. This equipment will be used to train Apex drivers to unload cement, fly-ash, sand and similar materials from Apex trailers.

CONDITIONS:

1. The owner/operator, (o/o), shall operate/maintain this equipment in strict accord with recommendations of the manufacturer and/or sound engineering practices.

[District Rule 204]

2. Regarding integral baghouse equipment, the o/o shall have a continuing program of maintenance/inspections in accord with manufacturer's recommendations and specification which ensures compliance with District Rules. This program shall include, but not be limited to, regular opacity readings per EPA Method 22 while equipment is in operation, pressure differential measurements (if equipped with pressure differential device), and maintenance inspections; if visible emissions are observed, use of equipment should discontinue until the proper repairs are made. Logging of data shall be required with the log kept on site for a minimum of two (2) years. This log shall be provided to District, State, or Federal personal upon request.

[District Rule 204]
