CONDITIONS:

- 1.This hot mix asphalt plant shall not be operated unless it is vented to a functioning air pollution control device under valid District Permit C003651.
- 2.Materials processed shall contain sufficient natural or added moisture to ensure compliance with all applicable District Rules such as those in Regulation IV. Sufficient water and equipment to properly wet the material being processed shall be maintained in operable condition on-site.
- 3.This asphalt plant shall be restricted to a maximum of 91,250 tons per month of finished product and not more than 375 tons per hour.
- 4.This asphalt plant may process recycled asphalt pavement material.
- 5.The use of recycled asphalt pavement material shall not exceed 25 percent of the aggregate feed to the pug mill or 90 tons per hour.
- 6.The owner/operator (o/o) shall authorize the District to secure verification of hourly and daily production rates from CalTrans weight records if applicable.
- 7.This equipment shall burn only natural gas.
- 8.A daily production and operation log shall be maintained current and on-site for two (2) years, and shall be provided to District personnel upon request. This log shall contain, at a minimum:
 - a. The weight of mix produced each hour and month in tons;
 - b. The number of hours operated each day; and
 - c. The weight of recycled asphalt pavement used each hour in tons.
- 9.This equipment does not require a regularly scheduled emission compliance test. However, emission compliance testing may be required at the discretion of the District.
