INACTIVE

B009705

Inactive type Permit has no description information.

EXPIRES LAST DAY OF: FEBRUARY 2012

OWNER OF OPERATOR (Co.#100)

Metropolitan Water District of So Calif
158000 MWD Road
Parker Dam, CA 92267

EQUIPMENT LOCATION (Fac.#571)

MWD - Gene Pumping Plant
158000 MWD Road
Parker Dam, CA 92267

Description:

BATCH PLANT consisting of: Fast-Way Batch Plant manufactured by Ideal Mfg., Inc., Mark III Model, Serial # MWD A013544

EQUIPMENT

Capacity	Equipment Description
0	Six cubic yard capacity hopper for aggregate and sand, with a charging height of 7' 3". The hopper discharge is through a manually operated slide gate.
0	Conveyor with a 160 gpm water system.
0	Cement auger with internal bag splitter and discharge height of 12' 9", with a capacity of three sacks of cement or 280 lbs.
0	Two (2) 11 hp Honda gasoline fueled engines that drive the equipment.
0	Digital weighing system for the aggregate hopper.
0	Water meter to measure the exact amount of water for the mix.

CONDITIONS:

1. This equipment and associated operations shall not discharge an exhaust stream that exhibits opacity greater than twenty percent (Ringelmann 1).

Fee Schedule: 1 (a)

Rating: 1 bhp

SIC: 4941

SCC: 30502506

Location/UTM(Km):
761E/3798N

This permit does not authorize the emission of air contaminants in excess of those allowed by law, including Division 26 of the Health and Safety Code of the State of California and the Rules and Regulations of the District. This permit cannot be construed as permission to violate existing laws, ordinances, statutes or regulations of this or other governmental agencies. This permit must be renewed by the expiration date above. If billing for renewal fee required by Rule 301(c) is not received by expiration date above, please contact the District.

Air Pollution Control Officer

2. The owner/operator (o/o) shall maintain a log of all material throughput amounts so as to verify the above condition. Additionally, a log shall be kept of all inspections, repairs, and maintenance on equipment. Such logs or records shall be maintained at the facility for at two (2) years and available to District personnel upon request.
3. Maximum plant concrete throughput shall not exceed 7.32 tons per hour. Maximum plant PM-10 emissions shall not exceed 0.03 tons per year.
4. The owner/operator (o/o) shall maintain this equipment in strict accord with those recommendations of the manufacturer/supplier and/or sound engineering principles which produce the minimum emissions of air contaminants.
5. Transit mix truck loading shall only occur through a properly operating urethane discharge boot that minimizes dust emissions.
6. All open material transfer points, such as conveyor drops, hopper and bin loading, shall be operated to minimize emissions of particulate matter.
7. The o/o shall ensure that the materials used in the equipment contain sufficient natural and/or added moisture to preclude violations of District rules 401, 402 and 403. These rules pertain to opacity, dust blowing off of the property and nuisance. The o/o shall maintain sufficient water and equipment for its application in operable condition and on-site, and use it as necessary on material piles, haul roads, and in the plant to prevent violations of the above rules.
