Air Pollution Control Officer

2. This facility shall not produce more than 5,250 tons in any one day nor shall it produce more than 800,000 tons per year.

3. A daily operational log for the facility shall be maintained and shall include the date and the total quantity of concrete produced. This log shall contain, as a minimum:

a. The total number of batches for the day,

b. The weight of each batch,

c. The total tonnage for the day,

d. The cumulative total production of each complete month, and

e. The cumulative annual total, including each complete month in the calendar year.

All records shall be kept on site for a minimum of two years and shall be made available to District personnel upon request.

4. The facility must submit accurate emissions inventory data to the District, in a format approved by the District, upon District request.
